PAIR OF CONFERENCES

Held by the Opposing Sides In Great Anthracite Cual Strike.

LABOR LEADERS VIEW SITUATION.

While Gompers and Mitchell Are Conferring at Wilkesbarre, the Operators Hold a Meeting In New York City.

Wilkesbarre, Pa., Sept. 16 .- Samuel Gompers, president of the American Federation of Labor, arrived here. He at once went to President Mitchell's headquarters where he met National Treasurer Wilson and the district presidents of the United Mine Work-

Mr. Gompers and the executive officers of the miners' union beld a lengthy conference. Before he went to the meeting Mr. Gompers was asked what his mission here was. He replied that he came to confer with Mr. Mitchell and the other officers of the union regarding the strike.

When the conference adjourned for dinner, Mr. Gompers was the only one who would speak regarding the deliberations. He sald the strike sltnation was discussed in all its phases; the finances were found to be in a good condition; the relief funds were coming in promptly, and there was no reason why the strike should not continue without inflicting any hardships on the strikers.

Mr. Gompers was asked whether it was proposed to levy an extra assessment in order to help the miners out. He declined to answer the question. He also refused to say whether the American Federation of Labor will be convened in extra session to take action on the strike.

Meeting of Coai Operators.

New York, Sept. 16 .- A conference of the leading anthracite coal interests was held at the Philadelphia and Reading company's offices. Those present included President Baer of dalt, of the Delaware, Lackawanna President Fowler of Coxe Brothers and Company, and reseuted the independent operating interests in the hard coal industry. The precise subjects of the conference could not be learned, but it was eharacter would not be seriously considered. Following a meeting with J. P. Morgan, John Markle made this statement. "I do not think it necessary to repeat that all talk of concessions on the part of the operators is foolish, and certainly without foundation. Our position now is the same as when Mitchell made his original propositions, and no different than when the strike began. So far as reeent attempts at settlement are eoneerned, it is only necessary to add that every effort from Senator Hanna's down has been futile. We have defined our position and will maintain It."

Force Increased. Tamaqua, Pa., Sept. 16 .- The working force at the Greenwood colliery was increased somewhat and the plant is now running apparently without difficulty. Last night a commlttee from the Tamaqua local of the United Mine Workers visited M. A. Gerber, the superintendent of the operation and asked him to close the plant. This he refused to do. MINISTER PELLETAN

Speaks of France's Naval Prowess In Mediterranean.

Bizerta, Tunis, Sept 16.-M. Pelletan. French inlnister of marine, made a remarkable speech, at an entertainment of the municipality, which is expected will cause the French foreign minister, M. Delcasse, some trouble to explain. After pointing out the Importance of Bizerta as a bulwark of France, M. Pelletan proceeded:

"We do not say we want to make the Mediterranean a French lake. We have been cured of the dreams of the great man, who wished us to dominate the world. But part of the Mediterranean is French and will remaln French. With this powerful stronghold so well situated for defense and also for attack, and with Corsica and Toulon, we can hold the open door between the two halves of the Meditteranean in spite of Malta and Gibraltar. Certainly I do not desire a conflict of peoples against England any more than against Italy, but as we do not know what others are doing, it is part of our duty to prepare for the holy war; for the French fatherland against its enemies who ever they may be. I am eonvinced, thanks to the fellow-workers with whom I am surrounded, that we can face every eventuality. Security hardly exists any more for the civilized world. At the end of the nineteenth century, after the defeat of France by the barbarism of old Germany, we saw an offensive return of the law of brute force. The whole world seemed to be dominated by the maxim: 'Might before right.' We must then devote all our efforts to keeping intact that focus of justice and light-'French genius.'"

France has at Bizerta a powerful military and naval stronghold which with Toulon on the north of the Meditterancan, French military and naval men assert that France's naval power in the west of the Meditteranean is masailable and all that is required to consolidate the position of France is the construction of the socalled eanal of two seas, which is to unite the Mediterranean with the Bny of Biscay, and thus render her independent of the straits of Gibraitar.

First White Republican Convention Republican state convention met here with a large attendance present, almost every county in Alabama being represented. James Bowron, former vice president Tennessee Coal, Iron and Railway company, acted as temporary chairman. The convention is composed exclusively of white men. being the first white Republican state convention ever heid in Alabama. Before the convention met the state executive committee unseated all negro delegates. A number of prominent negroes are on hand to protest against this action, but it is not expected their protests will be hecded. United States Senator J. C. Prichard of North Carolina is present by invitation and will address the convention. It is expected he will endorse the white movement. Former State Senator H. L. McElderry of Talladega is slated for governor.

Nothing Given Out.

Des Moines, la., Sept. 16.-Attorney General Mullan handed an ophnion to Governor A. 11. Cummins with regard to the legality of the recent filing of incorporation papers of the Rock island and Pacifie Railway company with the secretary of state. The governor refuses to make public the contents of the opinion for the reason that he desires to have a statement from himself accompany the same when made public. No intimation has been given of the position taken by the attorney general and all statements made with regard to the same are simply guesses. Governor Cummins left for Ames, fa., to attend a meeting of the board of trustees to the late President Beardshear, of the lowa state agricultural college. He will leave upon his return for Massathe Des Moines crulser.

Andrews Testifies.

Detroit, Sept. 16 .- Frank C. Andrews, who was convicted of misapplying and misappropriating funds of the wrecked City Savings bank of this city, took the witness stand in investigation of the jurors who convieted him, which resulted in the affidavits on which his pending motion for a new trial is based. Andrews said that ahout two weeks before the end of his trial he heard that one of gesis at the German Theological semthe jurors was prejudiced against him inary of Newark, died from congesand Detective Connelly Investigated the matter. He found that Juror Bock had made statements against the vessel was three days out from Andrews. FEDERAL PLAN URGED

Senate Brought Face to Face With the Issue In the Code Bill.

CHANGES MADE IN THE NASH BILL.

Efforts of Chichanath Members Before the House Committee to Incorporate the Board Plan Quickly Voted Down.

Columbus, O., Sept. 16 .- The session of the select committee of the house had a long and stormy session, but two points were decided. The first was that there will be no more night sessions of the committee and the second that the Nash code will look more like the federal plan than anything else when it is reported back to the house. Only one section of the code was considered at the session, that being a continuation of the meeting Monday evening when tho committee hung up on the Denman motion, which was overwhelmingly defeated. A motion by Mr. Williams which had the effect of giving Clnclnnati a board for public safety was voted down.

The senate struck the milk in the code coconnit when it reached the section providing for the election of a board of public service to consist of three members. When the section had been read, Mr. Moore of Athens offered an amendment providing for five instead of three members, which was promptly voted down, and then Senator Judson offered an amendment providing for the election of a director of public improvements. This raised the question directly of substituting the federal plan for the board plan, and provoked an animated discussion, which occupied the entire morning session, with a vote still not reached when the senate recessed for the noon hour.

A bill drawn by Attorney General Sheets will be introduced to set right the jury laws in the counties of Cuyahoga, Hamilton, Franklin, Lucas, Montgomery and Mahoning. In these six counties the juries are drawn under special and therefore undoubtedly unconstitutional acts. The bill reenacts, with a few minor amendments, the law now in force in 82 eounties of the state, making it applicable to all. The most Important change increases from three to 10 the number of days during which the jury commission may remain in ses-

The Nash code will be the basis of calculation with the house code committee. This action, however, was not seenred without a struggie, as a strong minority opposed it. The committee met in the thance committee room. The attendance was not large but there was a quorum present. Mr. Cale of Hancock county moved that as there were four code bills before the committee, house bill No. 5, the governor's code, he used as a basis for action by the committee, and this was promptly seconded by Mr. Worthington, another administration man. Vigorous speeches followed for and against the proposition, and the Nash code was adopted at once

as a basis for further discussion. A plan of government was decided npon by the comulttee. This will be the department plan. Heads of departments will be elected by the

GRADUALLY the economic issues before the people, remarks the Philadelphia Record, are tending toward one central and all-embracing question, shall or shall not a high protective duty be levied on trust-made goods sold in the world's markets? The burden of proof is upon those who insist that such an adjunct of public plunder is a necessary factor in our administrative policy.

The Johnstown (Pa.) Democrat quotes Secretary of the Treasury Shaw as denying Sugar Trust Havemeyer's declaration that "the tariff is the mother of trusts" and then quotes what Mr. Shaw himself says of the tariff, that "it is simply the parent of conditions that make it profitable for capital to combine." "That is," says the Democrat, "according to Mr. Shaw the tariff is not the mother, but only the grandmother of trusts. The answer of the people to Mr. Shaw, is 'then knock the grand- is visiting Mrs. Golden, of Newport. mother on the head.'

PICTURE this little scene to yourself: An American housewife goes into a store and buys a pound of borax, paying 8 cents for it. As she turns away with | ware, O. her package, another housewife comes in buys two pounds of borax and is charged 5 cents for her purchase.

"Why do you charge me 8 cents for one pound of borax and let that other woman have two pounds for 5 cents?" the American housewive demands.

'Oh." answers the storekeeper blandly, "she's English, you know."

How long would that storekeeper, openly discriminating in favor of the foreign and against the native customer, be business anywhere in

United States? Yet this transaction in borax illustrates perfectly what the trusts are doing on a colossal scale in the home and foreign markets, says the New York World.

THE Republican party replies to the people's demand for tariff revision with the statement that it must be revised by its friends. But when will that be done? The Republicans do not attempt to ex- sister. plain why their party majority at the last session of Congress throttled Representative Babcock and refused to consider any question of tariff modification. They do not explain why no effort was made to strengthen the hands of the Attorney General so that a fight against the trusts might have some chance of success. That the Republican leaders have steadily opposed all tariff legislation is beyond a doubt and in the present campaign handbook of the Republi- and renewing old acquaintances of his gallon or barrel; the finest in the State; can Congressional Committee there is no intimation of a purpose to revise it at all.

MR. BABCOCK'S STRONG ARGU-

Hyde in his nature got its ascendency over the Dr. Jekvil of him, said: Shall we continue a tariff in articles that yield no revenue, need no protection and are articles of export? To-day the Democratic party is asking that same question and they are and 282 miles of road traverse were run answering it as Mr. Babcock then an- and 355 elevations were established. swered it, when he said such a tariff The map for which these data are being "simply inures to the benefit of those who control any such commodity, since by its aid they can fix exorbitant prices in the domestic market.' That is the sum and substance of the whole argument for tariff revision, and is so strikingly and so pungently put that Mr. Babcock must have had a very clear view of the matter when he said it. "A tariff on articles that yield no revenue." That is what the Democrats protest against They urge with all earnestness, and justly so, that the duties on trust-made goods must go. Trust-made goods are goods that, to quote Mr. Babcock, "Are articles of export," the tariff on them yields no revenue, but simply enables the trusts that make them "to fix exorbitant prices in the domestic market." This is the position the Democratic party has always taken tistics of cures affected by Dr. Pierce's Golden on the tariff question, and the position they maintained in the battle of the people against the money power which has come to be such a serious menace to our country that even the Republicans are professing to be alarmed at it. And the only reason we can discover why Mr. Babcock should have recanted from the Discovery" supplies that nourishment in most doctrine preached by him and just quoted is that he found himself occupying a

We promised you when we came here a little over a year ago to make this store the finest in Maysville, that is if you gave us your patronage. You have done your part nobly—we have been trying to do ours. Have we?

To-day we can announce that we have ready on our second floor a department devoted to Ladies', Misses' and Children's READY-TO-WEAR goods, as nice as any in the State of Kentucky. We had intended to have a grand opening when all was completed, but goods are crowding us so and new goods crying to be shown, and lots of them are being asked for, so we have concluded to show our line as they come in, hoping to have our house warming later on. Ready for your inspection now-

Innovation in House Building.

There is considerable interest in an innovation in house construction introduced by Mr. R. M. Hardeman, of Lexington. It is a combination frame and brick, the weather boarding being dispensed with and a single course of brick in its stead. The brick are tied to the studding by galvanized wire. To all appearances it will be a solid three course brick house, and it is claimed has all the advantages of both kinds and none of the disadvantages of either. This method generally prevails in the Northwest and on the Pacific coast and is very popular; Mr. Hardeman was a resident of Maysville many years.
